PSI Molded Plastics Invests \$5 Million in Manufacturing Facility Expansion

Wolfeboro NH – February 10, 2025 – PSI Molded Plastics, a leading provider of custom injection molding and finishing services, announces a significant investment of \$5 million in its manufacturing facility located in Marion, South Carolina. This investment marks a pivotal moment for the company as it expands its production capabilities to meet growing demand and enhance customer satisfaction.

The investment is primarily focused on plant expansion and the acquisition of state-of-the-art molding presses, further fortifying PSI Molded Plastics' position as a leader in the industry. These additions will not only increase production capacity but also enable the company to offer enhanced services and deliver superior-quality products to its customers.

"This investment underscores our commitment to innovation, quality, and customer satisfaction," said Bob Muir, President and CEO at PSI Molded Plastics. "By expanding our manufacturing facility and incorporating advanced molding presses, we are poised to meet the evolving needs of our customers while maintaining the highest standards of excellence."

The expansion of the manufacturing facility will create job opportunities within the local community and contribute to economic growth. It reinforces PSI Molded Plastics' dedication to supporting the communities in which it operates.

With this significant investment, PSI Molded Plastics reaffirms its position as an industry leader committed to delivering innovative solutions and superior products to its customers worldwide.
